

ALEX CARTER

Aspiring Software Engineer | AI & ML Enthusiast

SUMMARY

Motivated computer science engineering student with hands-on experience building web applications, machine learning prototypes and computer vision projects. Strong foundation in Python, JavaScript, React, SQL and Git. Interested in software engineering, artificial intelligence and full-stack development.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, C++, SQL

Web: HTML, CSS, React, Node.js, REST API

AI/ML: Machine Learning, Deep Learning, TensorFlow, OpenCV, Computer Vision

Tools: Git, GitHub, Docker, Linux, VS Code

PROJECTS

AI Resume Analyzer

- Developed a web-based resume analysis application using Python and Flask.
- Implemented skill detection, resume section analysis and ATS-style scoring.
- Built a responsive dashboard using HTML, CSS and JavaScript.

Computer Vision Attendance System

- Created an OpenCV-based application for face detection and attendance tracking.
- Improved the workflow by automating image processing and record generation.

Student Management Web App

- Built a React and Node.js application with REST API integration and SQL database support.

EDUCATION

B.E. Computer Science and Engineering

ABC Institute of Technology | 2023 – 2027

EXPERIENCE

Software Development Intern — Tech Solutions

- Developed frontend components using React and JavaScript.
- Worked with Git and GitHub for version control and team collaboration.
- Assisted in testing REST APIs and fixing application issues.

ACHIEVEMENTS

- Participated in college hackathons and technical symposiums.
- Built multiple AI, computer vision and full-stack development projects.
